Arabic	Basic

Ayesha Ali

Front-End Developer · Software Engineering Student

PROFILE

- **Education:** Third-year Software Engineering student at the Islamia University of Bahawalpur
- **Certification:** Front-End Development certificate and 2-month internship at CodeThinker
- **Front-End:** Skilled in building responsive, animated React applications with Tailwind CSS and Framer Motion, including full CRUD dashboards and multilingual (English/Urdu) interfaces
- **Other Skills:** Working knowledge of Python and Oracle SQL, with personal projects spanning both front-end and back-end development
- **Goal:** Seeking an internship to apply and grow these skills in a professional development team

EXPERIENCE

Front-End Development Intern

CodeThinker

2-month internship

- Completed a front-end development certificate program covering modern web development practices
- Applied HTML, CSS, JavaScript, and React fundamentals on guided practical projects

PROJECTS

City Zoo Management Dashboard

Personal Project — Live at zoo-eight-green.vercel.app

- Built a full-featured zoo management dashboard with complete CRUD functionality for donor and charity records
- Implemented a custom i18n system supporting English and Urdu, including full RTL layout support
- Designed responsive layouts with a mobile sidebar drawer and Framer Motion scroll/mount animations
- Deployed and debugged the production build on Vercel

React (Vite) Tailwind CSS Framer Motion React Router Swiper

Tourism Website

Personal Project — In Progress

- Scaffolding a tourism website using Next.js with a focus on clean, responsive UI components

Next.js Tailwind CSS

Hospital Management System

Academic Team Project

- Designed and implemented an Oracle SQL database with five tables to manage hospital records
- Wrote SQL queries and PL/SQL logic for full CRUD operations, connected to a Python back end via cx_Oracle
- Collaborated with a team to design the database schema and backend logic

Python Oracle SQL cx_Oracle

Akoya Premium Laundry — Booking Website

Personal Project — Qatar Market

- Built a luxury laundry service website with a booking flow tailored for the Qatar market
- Implemented responsive, animated components and multilingual support using react-i18next

React (Vite) Tailwind CSS Framer Motion react-i18next

Flappy Bird Game

Personal Project

- Built a Flappy Bird clone in Python, implementing game loop logic, collision detection, and scoring

Python Pygame

COURSEWORK

Algorithms & Data Structures · Database Systems (Oracle SQL) · Software Design Principles · Multivariable Calculus
